

Event Name	SCS Seminar on Electrocatalysis 2026
Date	30. Aug – 03. Sep 2026
Location	Stoos Lodge, Stoos
Focus/Topic	This International Summer School aims at providing an overview about state-of-the-art approaches and concepts tackling contemporary challenges which are associated with the decarbonization and defossilization of the chemistry sector. In this context, electrochemical processes are considered essential to enable this transition as they provide means to produce platform chemicals on larger industrial scale or fine chemicals of higher value using renewable energy sources. To shine light on the actual sustainability aspects of the transformation processes under consideration insights from life cycle analyses (LCAs) will be presented and discussed.
Audience	PhD students and Postdocs as well as junior scientists from industry Max. capacity 90 participants.
